SUMMARY

Software engineer and statistician. I build open-source tools for AI agents, retrieval systems, and data APIs (Langflow, AI Workbench, Astra DB Data API, ToolGuard) on IBM's Developer and Operator Experience team. Previously at DataStax, Daisi Technology, and Chief Data Scientist at Omni Analytics Group. PhD in Statistics & Computer Science (Iowa State, 2017), with a research background in forensic statistics.

RESEARCH INTERESTS

Exploratory data analysis · Statistical graphics · Statistical computing · AI agent tooling · Reproducible research · Forensic statistics.

EXPERIENCE

IBM – Software Engineer · Developer and Operator Experience

August 2025 – Present · Remote (Seattle area)

- Core maintainer of [Langflow](#) (147k+ GitHub stars). 324+ commits across 73+ active weeks; 240+ merged PRs.
- Shipped the **Langflow SDK / Flow DevOps API Toolkit** (PR #12245), unifying programmatic flow, run, and deployment management.
- Active contributor to [AI Workbench](#), a self-hosted Astra-backed product surface for workspaces, knowledge bases, ingest, retrieval experiments, agents, MCP, and runtime operations.
- Deep work on **Model Context Protocol (MCP)** integration, including OAuth, auth-flow resilience on server restart, self-referential schema handling, and optional-type preservation.
- Refactored the **ModelInput selector** across Langflow (PR #12025) for a consistent model-provider UX.
- Ongoing contributor to the **Astra DB Data API** stack: [astradbpy](#) Python client, Unstructured integration, and portal ingestion backend.
- Contributor to [ToolGuard](#) upstream.

DataStax – Software Engineer

December 2022 – August 2025 · Remote (California)

- Joined Langflow core after DataStax acquired Langflow in April 2024; moved to IBM when IBM acquired DataStax in 2025.
- Integrated Langflow with Astra DB and watsonx; built hybrid-search and GenAI workflow examples.
- Authored "[Build a GenAI Workflow with Hybrid Search and Langflow](#)" and contributed to Apache Pulsar AI pipelines ("[Build a real-time AI pipeline with Pulsar Functions](#)" for InfoWorld).

Daisi Technology – Senior Data Scientist

March 2019 – November 2022 · Remote (California)

- Built reference "daisies" (serverless Python cloud functions) for YOLO object detection, time-series forecasting with Prophet, sentiment analysis, PCA, PDF extraction, and more.
- Wrote most of the platform's engineering blog: end-to-end pipelines, R interop, sentiment, YOLO, and the Daisi Chain.

Omni Analytics Group – Chief Data Scientist

May 2017 – May 2021 · Remote (Iowa)

- Led the company's data-science practice; built Shiny applications and delivered training under the *Creating and Designing Interactive Web Applications with Shiny* banner.
- Helped seed OmniacsDAO for open-source Numerai, Uniswap, and Aave tooling.

Iowa State University – Research Assistant, Teaching Assistant, Instructor

August 2012 – May 2017 · Ames, IA

- PhD candidate in Statistics & Computer Science.
- Research with CSAFE on automated forensic bullet-matching.
- Instructor of record for Engineering Probability (STAT 231) and Introduction to Business Statistics (STAT 226); TA for STAT 305, 430, 480, 579.

TIBCO Software, Inc. – Quality Assurance Intern

Summers 2010 – 2013 · Seattle, WA

EDUCATION

Iowa State University PhD, Statistics & Computer Science – 2017 MS, Statistics – 2014

University of Washington BS, Statistics, *cum laude* – 2012 BS, Computer Engineering, *cum laude* – 2012

OPEN-SOURCE SOFTWARE

- [langflow-ai/langflow](#) – core maintainer.
- [datastax/ai-workbench](#) – contributor to the Astra-backed RAG workbench.
- [Aeroza](#) – programmable weather intelligence: radar, geospatial queries, streaming APIs, and nowcasting.
- [bulletR](#) – R package for bullet-striation matching. (CRAN-archived 2025; actively maintained on GitHub.)
- [bulletxtctr](#) – 3D bullet scan feature extraction.
- [OmniacsDAO](#) – Numerai/Uniswap/Aave R & Python tooling.

AWARDS

- ASA Imaging Section Student Paper Award – 2016
- Ron Wasserstein Award for Best Contributed Paper in Statistical Education – ASA, 2015
- ASA Computing Section Student Paper Award – 2015
- Kempthorne Award for Best Student in Linear Models – 2013
- ASA Data Exposition, 1st Place – 2013

SELECTED TALKS

- **Reproducing User Actions in Shiny** – Shiny Developer Conference, Palo Alto, 2016
- **ASA Traveling Workshops** (with Dianne Cook) – UCLA / Chapman / Pfizer, California, 2015
