Eric Hare

Software Engineer at IBM · Developer and Operator Experience · PhD, Iowa State · Lake Stevens, WA

Email ericrhare@gmail.com · eric.hare@ibm.com **Web** erichare.me **GitHub** github.com/erichare **LinkedIn** eric-h-15280938

SUMMARY

Software engineer and statistician. I build open-source tools for AI agents (Langflow, CUGA, ToolGuard) and contribute to the core Langflow project at IBM. Previously at DataStax, Daisi Technology, and Chief Data Scientist at Omni Analytics Group. PhD in Statistics & Computer Science (Iowa State, 2017), with a research background in forensic statistics.

RESEARCH INTERESTS

Exploratory data analysis · Statistical graphics · Statistical computing · AI agent tooling · Reproducible research · Forensic statistics.

EXPERIENCE

IBM — Software Engineer · Developer and Operator Experience

August 2025 — Present · Remote (Seattle area)

- Core maintainer of Langflow (147k+ GitHub stars). 324+ commits across 73+ active weeks; 240+ merged PRs.
- Shipped the **Langflow SDK / Flow DevOps API Toolkit** (PR #12245), unifying programmatic flow, run, and deployment management.
- Deep work on **Model Context Protocol (MCP)** integration, including OAuth, auth-flow resilience on server restart, self-referential schema handling, and optional-type preservation.
- Built the **policies component via ToolGuard** (PR #12592), giving Langflow users declarative control over what tools an agent is allowed to call.
- Refactored the **ModelInput selector** across Langflow (PR #12025) for a consistent model-provider UX.
- Contributor to CUGA, IBM Research's open-source generalist agent harness, and ToolGuard upstream.

DataStax — Software Engineer

December 2022 — August 2025 · Remote (California)

- Joined Langflow core after DataStax acquired Langflow in April 2024; moved to IBM when IBM acquired DataStax in 2025.
- Integrated Langflow with Astra DB, watsonx, and Docling for document parsing.
- Authored "Build a GenAI Workflow with Hybrid Search and Langflow" and contributed to Apache Pulsar AI pipelines ("Build a real-time AI pipeline with Pulsar Functions" for InfoWorld).

Daisi Technology — Senior Data Scientist

May 2021 — December 2022 · Remote (California)

- Built reference "daisies" (serverless Python cloud functions) for YOLO object detection, time-series forecasting with Prophet, sentiment analysis, PCA, PDF extraction, and more.
- Wrote most of the platform's engineering blog: end-to-end pipelines, R interop, sentiment, YOLO, and the Daisi Chain.

Omni Analytics Group — Chief Data Scientist

May 2017 — May 2021 · Remote (Iowa)

- Led the company's data-science practice; built Shiny applications and delivered training under the *Creating and Designing Interactive Web Applications with Shiny* banner.
- Helped seed OmniacsDAO for open-source Numerai, Uniswap, and Aave tooling.

Iowa State University — Research Assistant, Teaching Assistant, Instructor

August 2012 — May 2017 · Ames, IA

- PhD candidate in Statistics & Computer Science.
- Research with CSAFE on automated forensic bullet-matching.
- Instructor of record for Engineering Probability (STAT 231) and Introduction to Business Statistics (STAT 226); TA for STAT 305, 430, 480, 579.

TIBCO Software, Inc. — Quality Assurance Intern

Summers 2010 — 2013 · Seattle, WA

EDUCATION

Iowa State University PhD, Statistics & Computer Science — 2017 MS, Statistics — 2014

University of Washington BS, Statistics, *cum laude* — 2012 BS, Computer Engineering, *cum laude* — 2012

PUBLICATIONS (SELECTED)

Full list at /publications.

- Hare, Hofmann, Carriquiry. **Automatic Matching of Bullet Land Impressions**. *Annals of Applied Statistics*, 2017. doi:10.1214/17-AOAS1080
- Hare, Hofmann, Carriquiry. **Algorithmic Approaches to Match Degraded Land Impressions**. *Law, Probability and Risk*, mgx018, 2017. doi:10.1093/lpr/mgx018
- Hare, Kaplan. **Designing Modular Software: A Case Study in Introductory Statistics**. *JCGS*, 2017. doi:10.1080/10618600.2017.1386568
- Hare, Buja, Hofmann. **Manipulation of Discrete Random Variables with discreteRV**. *R Journal* 7(1), 2015.
- Sieber, Hare, Hofmann, Trepel. **Biomathematical description of synthetic Peptide libraries**. *PLOS ONE* 10(6), 2015.

OPEN-SOURCE SOFTWARE

- **langflow-ai/langflow** — core maintainer.
- **bulletr** — R package for bullet-striation matching. (CRAN-archived 2025; actively maintained on GitHub.)
- **discreteRV** — R package for teaching probability.
- **bulletxtrctr** — 3D bullet scan feature extraction.
- **OmniacsDAO** — Numerai/Uniswap/Aave R & Python tooling.

AWARDS

- ASA Imaging Section Student Paper Award — 2016
- Ron Wasserstein Award for Best Contributed Paper in Statistical Education — ASA, 2015
- ASA Computing Section Student Paper Award — 2015
- Kempthorne Award for Best Student in Linear Models — 2013
- ASA Data Exposition, 1st Place — 2013

SELECTED TALKS

- **Reproducing User Actions in Shiny** – Shiny Developer Conference, Palo Alto, 2016
- **intRo: Statistical Analysis Software for Teaching** – Joint Statistical Meetings (contributed paper), Seattle, 2015
- **Manipulation of Discrete Random Variables in R with discreteRV** – useR!, Aalborg, DK, 2015
- **ASA Traveling Workshops** (with Dianne Cook) – UCLA / Chapman / Pfizer, California, 2015
